

2020 Controlled Substances and Beyond: The Pain Puzzle, a Comprehensive Overview

The Center for Advanced Practice is proud to offer an advanced practice program focusing on the principles of pharmacology in relation to schedule II-V controlled substances. The course explores evaluation, treatment management and standardized procedures and protocols of controlled substances, with an emphasis on schedule . This course will also review non-pharmacologic management to pain. Additionally, the course will review the legal and prescribing aspects associated with management; as well as reviewing misuse, abuse, and drug diversion and Neonatal Abstinence Syndrome; and conclude with a review of ADHD medications.

Program Objectives

- Analyze state laws and federal regulations pertaining to furnishing, dispensing, and administering controlled substances Schedule II-V for nurse practitioners and physician assistants including the legal and professional relationship between a nurse practitioner, physician assistant and his or her supervising physician.
- Describe the elements of a comprehensive pain evaluation, including a pain assessment, how to take a detailed substance abuse history, recognition, prevention, and management of acute and chronic pain.
- Describe the indications and process for assessing response and compliance of the patient to the controlled substance and when to discontinue chronic opioid therapy.
- Describe how to adjust Schedule II Controlled Substances medications as needed to achieve and to maintain remission of ADHD symptoms.
