PCCN Certification Review

November 14 & 15, 2023
8:00 am- 4:00 pm

This 2-day intense acute care review course is intended for nurses who are planning to take the AACN-PCCN certification exam. The lectures and time allotment are based on the PCCN exam blueprint and will cover all body systems, physiology, pathophysiology, assessment strategies and treatment options for medical and surgical acutely ill patients. This course will benefit those who have step-down and telemetry experience and want a clinical update and review of latest best practice and those who have studied and want a final review prior to taking the PCCN certification exam. This seminar is not intended as a basic progressive care course and is recommended for nurses with at least one year of step-down experience.

Learning Objectives

- Identify common cardiovascular pathologies seen in patients.
- Discuss the neurological assessment associated with a stroke.
- Indicate what signs and symptoms are associated with shock and sepsis.
- Describe common sign and symptoms of endocrine disorders.
- Identify assessment of a patient with anemia and coagulopathies disorders.
- Recognize the ethical practice for the nurse and how biases affect decisions in patient care.

Credits

- ANCC: 13.5 contact hours¹
- CA BRN 13.5 contact hours²
